FDOT encourages increased traffic awareness for July 4 activities

Jacksonville – Florida Department of Transportation joins with our partner agencies to encourage safe, responsible driving along our roadways for the Fourth of July Independence Day activities as record numbers are expected to travel.

FDOT is minimizing road and lane closures July 2-4 in and around major construction zones to assist in traffic flow. We realize an emergency may occur at any time and efforts will be made to resolve the emergency as soon as possible.

Traffic impacts such as road and lane closures around the Jacksonville area are posted on www.nflroads.com. Emergency construction or maintenance impacts to major state roadways in northeast Florida's state major roadways are posted on Twitter at www.twitter.com/myfdot_nefl.

The Regional Transportation Management Center in Jacksonville monitors major corridors continuously through the Intelligent Transportation System that enables FDOT operations personnel, law enforcement and information partners to coordinate actions and information in a more timely and efficient manner. Information is also provided through our Interstate Welcome Centers.

FDOT's contractors regularly patrol the state roadway system in and around Jacksonville to assist in identifying potential hazards or negative impacts to travel.

Know before you go by using the FL511 system. There are five convenient ways for all motorists to receive traffic updates:

- Download the free Florida 511 mobile app available on Google Play or Apple App Store.
- Call 511 toll free for updates in English and Spanish.
- **Visit FL511.com** for interactive roadway maps showing traffic congestion and crashes, travel times and traffic camera views.
- Sign up for a "My Florida 511" account at FL511.com to create custom routes and register for email, text or phone alerts.
- Follow one of the 13 statewide, regional or roadway-specific Twitter feeds (#FL511).

Those traveling in an around Jacksonville are encouraged to also check for additional information at www.jaxsheriff.org.

FDOT also emphasizes the following driving safety tips provided by the Department of Highway Safety and Motor Vehicles (DHSMV).

- Always buckle up. A seatbelt is your vehicle's most important safety feature.
- Designate a sober driver and never drive impaired. Remember: even one drink increases the risk of a crash while driving. Do not let anyone who has been drinking get behind the wheel, including you.
- Check your tires before you take a trip. Properly maintaining and inspecting your tires before a long trip is a key step in keeping your family safe while traveling. It is crucial that motorists educate themselves on the importance of maintaining proper tire pressure and inspect tire tread and damage on a regular basis in order to avoid potentially fatal tire failure and rollover crashes.
- Stay focused on driving and do not drive distracted. Distracted driving is extremely risky behavior that not only puts drivers and passengers in danger, but also pedestrians and bicyclists sharing the road. Focused attention on driving helps to prevent crashes overall.
- Travelers should to use caution when traveling through an area where there is smoke, especially at night.
- Call *FHP (*347) to report drunk drivers, traffic crashes, stranded or disabled motorists or suspicious incidents on the road.
